Pro|Edge
Video Streaming Recorder (VSR)

The I-O Pro|Edge Video Streaming Recorder (VSR) is a simple-to-use encoding system designed to stream events live on the Internet, record the event for later viewing or editing, or a direct upload of the event to YouTube.

The System is Designed for Live Internet Broadcasts and Video Recording of Events Such As:

- School Lectures
- City Council Meetings
- Public Sector Meetings
- Corporate and Legal Training
- YouTube Product Presentations
- Convention Speeches
- Legal Depositions
- Panel Discussions
- Church Services
- Funerals

Streaming and Output Options Include:

- Windows Media Streaming
  - Windows Media Video (.wmv)
- Flash Media Streaming
  - Flash Video (.flv)
- Direct Upload to YouTube
- 320X240 or 640X480 Resolutions
- 150 kbps (Stream and Record)
- 450 kbps (Stream and Record)
- 750 kbps (Stream and Record)
- HQ VBR 95 (Record Only)
- User Defined (Advanced Users)

The VSR's intuitive front panel interface guides even the novice user through the complex task of producing a live Internet Stream or creating an a standard format video file (.wmv or .flv) that can be imported into most video editing software.
